Blue Innovation Track for Advanced Water Leaders

You are an experienced and capable leader in your sector. But are you prepared to reach the next levels of water & environmental leadership for an uncertain future of natural resources?

Blue Innovation Track is a unique development, training and co-creation platform for:

- Mid-to-high level officials in the water, environmental and interdependent work fields – with more than 6 years of experience.
- Leaders seeking to expand their leadership strategies and raise performance standards.
- Managers who are keen to learn and experiment with their water/environmental sector counterparts from different backgrounds and geographic areas

Where you will go

Immerse yourself in innovative methods and specialized practices of leadership development to benefit your own targets, team objectives and your organization's contribution to the sector. In Blue Innovation Track, you will become part of a social learning community to generate a new wave of teamwork and impact.

What tools will take you to the next levels?

Target knowledge and professional tools are applied through an integrated programme of professional skills development; knowledge creation and transfer; and social learning through community development.

5 professional training days:

- Advanced leadership strategy
 - Leading through future complexity
 - Dealing with situation emotions
 - Leading in the unknown and volatile
 - Inclusive teambuilding for impact
-
- 3 guided InterVision (Peer Coaching) sessions.
 - Innovation sprints on your cases

New ways of working for new challenges

Blue Innovation Track is positioned to tackle a range of questions that advanced leaders need to take into account in a truly complex workplace of the future. You will practice better collaborations across geographical boundaries and professional disciplines, and how to make the most of evolving digital tools.

BLUE INNOVATION TRACK

How is the schedule organized?

Blue Innovation Track is a social learning community with 6-12 participants in each group, and with integration in the New Waves Community of H2O-People and partner experts/organizations

- 2 online days
- 3 online InterVision sessions (3x2h = 6 hrs)

5 days face-to-face integrated programme in a specialized Boot Camp, located in an exclusive location in The Netherlands.

From our sector experience and synergies

You will be guided in generating target strategy-based solutions to apply in present and future scenarios. Blue Innovation Track is born from the success of our European Junior Water Programme (EJWP), and we are pleased to offer this Advanced Leadership Programme to face changing scenarios linked to water resources, climate and environmental health.

What are the benefits of Blue Innovation Track for you and your team?

- A broader scope of leadership development strategy and collaboration to navigate the future with effective tools and insights.
- A more agile approach in adapting to transitions shaping the future workplace.
- A testing ground for specialized innovation – with applied learning challenges.
- New networks across sectors and disciplines for future collaboration and synergies.
